Variable Message Signs

Designed and manufactured by OPTRAFFIC, the Variable Message Sign (VMS) is a fully solar powered device that can display any range of text message, graphics and animations in 5 colors.

OPTRAFFIC VMS is an ideal tool for local traffic management, council & constructional engineering, mining work safety, and also advertising and public notice of upcoming events like international conference expo and sport events.

OPTRAFFIC®

THE INDUSTRY LEADING MANUFACTURER

OPTRAFFIC VMS is designed in our ISO9001 facility with innovative technology. The unique hardware and software features of our VMS allow you to program all your devices anywhere and anytime via 3G connection.

You can find all the device locations, design and create any colorful message with graphic symbols, text or graphics combined, make multiple message screens, flashing animations, and/or detect the vehicle speed with optional radar installed.
